SUMMARY

A Computer Science undergraduate having a strong interest in **Quality Assurance and Software Development**, along with solid problem-solving skills. Experienced in building real-world applications, including mobile-based systems. Passionate about developing efficient, user-focused solutions and currently seeking an internship opportunity to contribute technical skills in a professional IT environment.

CERTIFICATIONS, ACHIEVEMENTS & SKILLS

Certificates- Advanced certificate course – NSBM Green University / British Council
English course- Colombo (ongoing)

Technical skills-

- **Languages:** Dart, C#, Java, JavaScript, Python, PHP, SQL (MySQL, SQL Server).
- **Frameworks & Web:** Flutter, Firebase, Bootstrap, HTML5, CSS3.
- **Tools & Design:** Git/GitHub, VS Code, Figma.

Soft skills- Teamwork & collaboration, Time Management, Problem Solving, Critical Thinking, effective communication, Presentation and Documentation skills

MAIN PROJECTS

ShuttleLink Transportation System + Report | Flutter Developer

Architected a comprehensive shuttle management system including dedicated Passenger and Driver modules. Developed a mobile application using Flutter and Firebase. Conducted unit, integration, and user acceptance testing using university students.

Lost and Found Mobile Application | Flutter Developer

Developed a cross-platform mobile application using Flutter and Firebase for real-time data synchronization. Implemented secure user authentication and a searchable database for tracking lost items. Focused on a clean, single-line navigation layout to ensure an intuitive user experience.

University Management Web Platform | Front-End Developer

Designed and developed a multi-page, responsive university website using HTML and CSS. Implemented a clean, user-centric navigation system and integrated a cohesive color scheme to reflect academic branding. Optimized layout performance for cross-browser compatibility, ensuring a seamless experience on both mobile and desktop.

E-Commerce Web Application | Full-Stack Developer

Architecting a dynamic e-commerce platform using C# for back-end logic and HTML/CSS for the front-end interface. Developing core functionalities including product catalogs, secure user data handling, and shopping cart logic. Focusing on scalable code architecture to bridge the gap between user interaction and server-side processing.

Campus Event Manager | Flutter Developer

Architected a full-stack event management platform featuring role-based access control for Admins and Students. Developed a dynamic mobile application using Flutter and Firebase, enabling real-time event updates, registration tracking, and role-specific dashboards. Implemented secure authentication and Firestore-based authorization to ensure only authorized administrators can create, edit, or delete events.

Queue Management System | Flutter Developer

Implemented a real-time virtual queuing and order-tracking system using Firebase to reduce physical peak-hour congestion and replace manual billing. Designed user-friendly, consolidated UI/UX interfaces on Figma for both user and staff dashboards to ensure smooth navigation.

SOCIETIES

- Member of Association of Computer and Data Science
- Member of Hackathon Hub

EDUCATION

BSc (Hons) Computer Science

NSBM Green University in affiliation with Plymouth
University, UK 2024 -2027 (Expected)

GCE A/L (Science -2023)

President's College, Minuwangoda

GCE O/L (9As -2020)

President's College, Minuwangoda
